

The Eureka County TV District is a local county Government entity that supplies TV to very rural Nevada. We have numerous translators at 4 different translator sites that are also re-transmitting FM radio. We provide TV service to 3 towns in Eureka County. We would like to continue to provide current service and eventually provide more channels. In the past we have experienced lengthy, costly delays in the grant processes and translator authorizations. Making it more difficult to apply for small translators would not improve our situation. At this time a fair share of the community would rather pay for satellite service than watch the limited channels through their antenna. This puts a strain on individuals that cannot afford satellite service.
